

1. Which fraction represents the location of point Q?

- A  $\frac{3}{10}$
- B  $\frac{4}{10}$
- C  $\frac{2}{5}$
- D  $\frac{3}{5}$

2. Which decimal represents the location of point Z?

- A 0.09
- B 0.01
- C 0.9
- D 0.8

3. **Writing to Explain** Draw a number line. Draw and label points to show the locations of  $\frac{5}{10}$  and 0.7. Explain your answer.

1. Which fraction represents the location of point Q?

- A**  $\frac{3}{10}$
- B**  $\frac{4}{10}$
- C**  $\frac{2}{5}$
- D**  $\frac{3}{5}$

2. Which decimal represents the location of point Z?

- A** 0.09
- B** 0.01
- C** 0.9
- D** 0.8

3. **Writing to Explain** Draw a number line. Draw and label points to show the locations of  $\frac{5}{10}$  and 0.7. Explain your answer.

1 pt  
2 pts. (1 ea.)

10 equal parts, each part = 1 tenth  
 $\frac{7}{10} = 0.7$

-1	83
-2	67
-3	50
-4	33
-5	17

Quick Check 12-4
