

**Project:** Styrofoam Light Switch Cover (Courtesy of Valley Forge Council, PA)

**Materials:** Styrofoam meat tray  
Different color magic markers or paints  
Double back tape

**Instructions:** 1) Cut desired outline from styrofoam tray. Some ideas - Scout Silhouette or Seasonal items such as snow man, Easter Bunny, etc.  
2) Cut out hole for switch in center of switchplate, 1 inch long x 1/2 inch wide.  
3) Decorate as desired.

**NOTE:** As an alternative, you can cut out a picture and glue to styrofoam instead of drawing and decorating.

4) Styrofoam switchplate can be installed over existing switchplate with double backed tape: or let Mom or Dad install with washers and screws.
