

Project: Log Cabin (Courtesy of Harry Doremus, Cub Scout Pack 42,
Lenape Council, S. Bound Brook, NJ)

Materials: Cardboard
Straws
Small Stones
Glue
Paint (optional)

- Instructions:
1. Cut cardboard and glue together to form sides, front, back and roof of cabin. (This can best be done by making and using a pattern).
 2. Glue straws up sides, front and back of cabin, leaving windows open. (Alternate straws so they overlap at ends and use shorter straws to fit inbetween).
 3. Glue straws on door and roof as shown.
 4. Glue two 9" straws (center) and four 3" straws (two on each side of long center straws) to back of cabin.
 5. Glue small stones onto straws for chimney.
 6. Paint if desired.
