## Family Story Starter

Describe the people in your family. Tell what each person does best or what your favorite thing is about a person or persons in your family.

Or, tell us about a special day you spent with one or all of your family members.

Or, draw a picture of a member or members of your family.

Please include a photograph of your family so we can add your family to our classroom family tree.

## Data Foot Shuffle

Trace each family member's foot, cut out the tracings and label them with the person's name and gender.

See if your child can sort them in size order from smallest to biggest.

We will be putting them in size order in class and we will see which family has the longest overall foot length.
