

Problem of the Day

13-5

Problem of the Day
13-5

Draw a picture to solve.

Draw objects that would have lengths of about 2 inches, about 2 feet, and about 2 yards. How can you check your estimates?

Problem of the Day

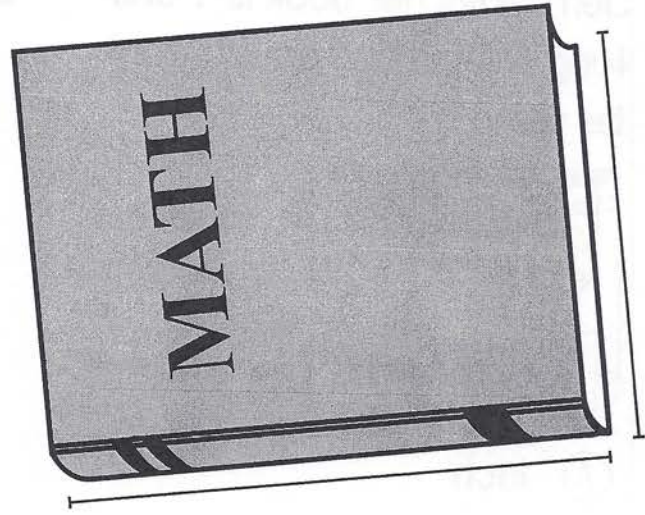

13-4

About how long is your math book?

About how wide is your math book?

Use paper clips to estimate and measure.

Tell the difference between your estimates and the real measures. Was your estimate closer the second time? If so, tell why you think so.

Problem of the Day
13-4
