

An Earth Lover's Environmental Awareness Unit

Materials Needed For Each Child

pencil, scissors, crayons or paint, stapler, glue

How To Use Pages 26-27

1. Reproduce pages 26 and 27 on construction paper or tagboard.
2. Have students read page 27. Discuss earth's ecological problems as well as ways that youngsters can contribute to their solutions.
3. Instruct students to color or paint the circular design (page 27) and cut it out.
4. Have students cut on the pattern outline on page 26. Provide extra sheets of manuscript paper that have been cut to match the outline on page 26. Staple one or two of these sheets beneath each student's page 26 cutout.
5. Have each student glue his circular cutout to the stapled pages as indicated.
6. Have each student write his name and write several things he plans to do to help save the earth.

Glue bottom of circle here.

My name is

I can help the earth. I can...
