

My Word Book

Name: _____

Dear Families,

This is your child's **Word Book**. It includes lists of high frequency words. High frequency words are words we see in our books, stories, and use in our writing. The first six pages list the 36 sight words introduced in Kindergarten and throughout the first two months at school. Each additional page will involve new first grade sight words as we continue our reading units. Each list corresponds with the stories we will read each week. Your child should practice reading the words on the lists each night for homework.

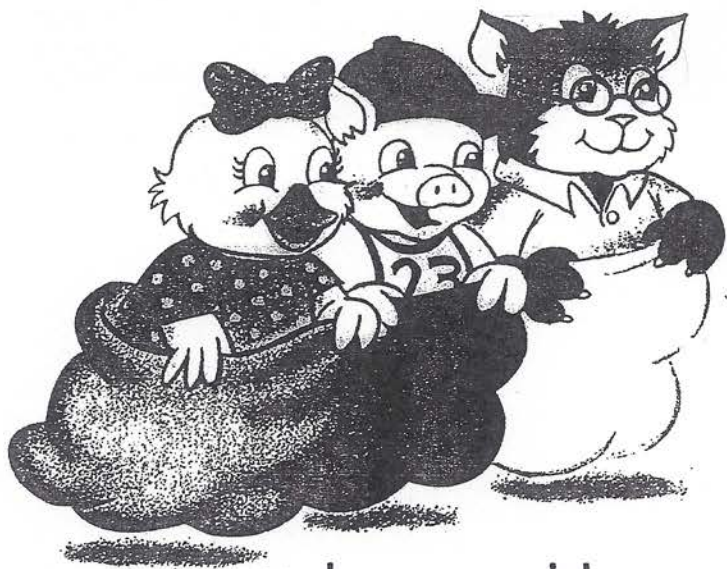

Our goal is to help your child become an independent reader. Reading and recognizing high frequency words quickly and accurately is an important part of reading. Below is a list of reading strategies for helping your child learn important sight words when reading books. When your child is reading, you can encourage your child to:

1. Look at the beginning and ending sounds in the words.
2. Read to the end of the sentence in order to decode the unknown word through context.
3. Use picture clues to identify unknown words.
4. Look for little words within the unknown word.
5. Highlight tricky words on the word lists and practice over and over.
6. Write words on Post-its notes and hang around the house.

As always, thank you for your support!!

Ms. Niznik
