Project: Christmas Cards (Courtesy of Connie Atkinson, Cub Pack 7,
                              Ft. Clayton, Canal Zone)

Materials: sheet of paper (8 1/2" x 11")
               light weight cardboard
               magic marker
               glue
               aluminum foil

Instructions: 1) Fold paper in half and then in half again.
               2) Cut a piece of aluminum foil the same size
                  as the front of your card.
               3) Cut Christmas design (tree, candy cane, etc) from
                  cardboard (no larger than front of card).
               4) Glue cardboard design onto face of card, then
                  cover face of card, including design, with glue.
               5) Place the piece of aluminum foil over glue and
                  press down, rubbing around outline of design to give
                  raised impression.
               6) Decorate as desired.
