Problem Solving Math Rubric

	Problem Solving	Calculations	Written Explanation
4: Advanced	 Use appropriate problem solving strategies to solve the problem. Your answer is right! 	 Uses correct procedure to find the correct answer(s). Labels answer correctly. All of your work is correct and labeled! 	 Shows a clear understanding of the concepts involved in the problem. You explain "why" for each step. You use the key word <u>because</u> to really explain "why" for each step.
3: Proficient	 Uses problem-solving strategies to work toward a solution. Your answer might be wrong 	 You give the correct answer(s). The calculation or procedure (work) is incomplete. Labels are incorrect or missing. 	 Shows a satisfactory understanding of the concepts involved in the problem. You explain "what" and
		You show the math but made a <u>small</u> mistake.	"how" for each step.

2: Basic	 Makes an attempt at using problem-solving strategies. 	 You give an incorrect answer. The procedure used is incorrect or partially correct. 	Shows a limited understanding of the concepts involved in the problem.
	You left out some important work.	 Labels are incorrect or missing. You show some math. You might have made a BIG mistake. 	You only told me <u>SOME</u> thinking about how you solved the problem.
1: Below Basic	 No use of problem- solving strategies Your math work did not help 	 Answer is not mathematically reasonable, or it may be correct with no indication of understanding. No procedure or work shown. 	Shows no understanding of the concepts involved in the problem. Explanation is unclear.
	you solve the problem.	 Labels are incorrect or missing. You show some math, but it does not help solve the problem. 	You told me <u>little</u> or <u>no</u> thinking about how you solved the problem.
