

Material: scissors, aluminum pie plate, any materials to make your shadow box interesting.

thread and tape hanger on
back

DIRECTIONS

1. Decide on the type of scene you wish to put into your aluminum shadow box.
2. "3-D" effects will make it more interesting. Use felt, construction paper, magazine or Christmas card pictures, cotton (to represent snow), grass from an Easter basket (for a summer scene), plastic or clay animals, other materials to add interest.
3. Use imagination.
