

# CONSTRUCTION

## Tissue Beads

## Task 116

Material: facial tissues, thread, needle, white glue, toothpicks, foil.

1. Shred facial tissues. Drop into a 50/50 mixture of white glue and water.
2. Allow to soak for a minute then shape into small beads.
3. Use a toothpick to make the holes and let dry.
4. Coat each bead with undiluted white glue. Place beads on foil to dry thoroughly.
5. Use strong thread and needle to string the beads.
